Our Mission:

The Family Recovery Council of Hampden County aims to support families in Hampden County who are involved with the Department of Children and Families (DCF) and have a parent or legal guardian struggling with substance abuse and co-occurring mental health challenges.

FRCHC's mission:

- To remove barriers to treatment services for families struggling with substance abuse and co-occurring mental health disorders; and
- To improve communication and collaboration across systems, in order to provide high-quality care and coordination of support for families in recovery.

We believe that if agencies work together at a cross-systems level, vulnerable families will be able to access the services they need quickly and smoothly. Better coordination of care for families will also promote engagement and retention in services, thus creating better outcomes for families.

Our Vision:

For every family to have access to the services and supports needed to promote full recovery.

Our Committees:

FRCHC meets every few months to share information and resources; build working relationships; and establish best practices for collaboration. Much of the important work needed to implement cross-systems change also takes place in our committees, which typically meet on a monthly basis.

FRCHC's Communication Committee aims to develop best practices for smooth collaboration between DCF, substance abuse and mental health treatment providers, and Early Intervention. Best practices for communication and collaboration are in development for the referral process, signing of consent forms, assessment, treatment, and family engagement (in areas such as safety planning, preparing for relapse, and clarifying expectations for being "on the same page").

FRCHC's Cross-Training Committee plans multiple trainings each year, such as:

- Annual cross-systems' conference;
- Trainings for DCF workers on addiction treatment and working with providers;
- Trainings for treatment providers on working with DCF, as well as parenting and family issues;
- Cross-systems training on Medication-Assisted Treatment and parenting.

FRCHC's Public Relations Committee aims to spread the word about family recovery and the work of the Council. Current projects include a brochure for parents (offering support and resources) and an informative and engaging website, with much more to come.

Collaboration Principles:

- No one organization or system can address all of the substance use problems facing families and communities.
- Ensuring child safety and family health requires collaboration and partnership among families, professionals, agencies, organizations, and communities.
- Every parent who has an addiction should have the opportunity to recover.
- Every child has the right to be free of abuse and neglect.
- Safety and permanency are the birthright of every child.
- Services should be family-focused, trauma-informed, needs-driven, and utilizing best practices.
